STATISTISCHES AMT DER EUROPÄISCHEN GEMEINSCHAFTEN
STATISTICAL OFFICE OF THE EUROPEAN COMMUNITIES
OFFICE STATISTIQUE DES COMMUNAUTÉS EUROPÉENNES

L-2920 Luxembourg — Tél. (352) 43 01-1 — Télex COMEUR LU 3423
Rue de la Loi 200, B-1049 Bruxelles — Tél. (32-2) 299 11 11

Eurostat hat die Aufgabe, den Informationsbedarf der Kommission und aller am Aufbau des Binnenmarktes Beteiligten mit Hilfe des europäischen statistischen Systems zu decken.

Um der Öffentlichkeit die große Menge an verfügbaren Daten zugänglich zu machen und Benutzern die Orientierung zu erleichtern, werden zwei Arten von Publikationen angeboten: Statistische Dokumente und Veröffentlichungen.

Statistische Dokumente sind für den Fachmann konzipiert und enthalten das ausführliche Datenmaterial: Bezugsdaten, bei denen die Konzepte allgemein bekannt, standardisiert und wissenschaftlich fundiert sind. Diese Daten werden in einer sehr tiefen Gliederung dargeboten. Die Statistischen Dokumente wenden sich an Fachleute, die in der Lage sind, selbständig die benötigten Daten aus der Fülle des dargebotenen Materials auszuwählen. Diese Daten sind in gedruckter Form und/oder auf Diskette, Magnetband, CD-ROM verfügbar. Statistische Dokumente unterscheiden sich auch optisch von anderen Veröffentlichungen durch den mit einer stilisierten Graphik versehenen weißen Einband.

Veröffentlichungen wenden sich an eine ganz bestimmte Zielgruppe, wie zum Beispiel an den Bildungsbereich oder an Entscheidungsträger in Politik und Verwaltung. Sie enthalten ausgewählte und auf die Bedürfnisse einer Zielgruppe abgestellte und kommentierte Informationen. Eurostat übernimmt hier also eine Art Beraterrolle.

Für einen breiteren Benutzerkreis gibt Eurostat Jahrbücher und periodische Veröffentlichungen heraus. Diese enthalten statistische Ergebnisse für eine erste Analyse sowie Hinweise auf weiteres Datenmaterial für vertiefende Untersuchungen. Diese Veröffentlichungen werden in gedruckter Form und in Datenbanken angeboten, die in Menütechnik zugänglich sind.

Um Benutzern die Datensuche zu erleichtern, hat Eurostat Themenkreise, d. h. eine Untergliederung nach Sachgebieten, eingeführt. Daneben sind sowohl die Statistischen Dokumente als auch die Veröffentlichungen in bestimmte Reihen, wie zum Beispiel „Jahrbücher“, „Konjunktur“, „Methoden“, untergliedert, um den Zugriff auf die statistischen Informationen zu erleichtern.

Y. Franchet
Generaldirektor

It is Eurostat's responsibility to use the European statistical system to meet the requirements of the Commission and all parties involved in the development of the single market.

To ensure that the vast quantity of accessible data is made widely available, and to help each user make proper use of this information, Eurostat has set up two main categories of document: statistical documents and publications.

The statistical document is aimed at specialists and provides the most complete sets of data: reference data where the methodology is well-established, standardised, uniform and scientific. These data are presented in great detail. The statistical document is intended for experts who are capable of using their own means to seek out what they require. The information is provided on paper and/or on diskette, magnetic tape, CD-ROM. The white cover sheet bears a stylised motif which distinguishes the statistical document from other publications.

The publications proper tend to be compiled for a well-defined and targeted public, such as educational circles or political and administrative decision-makers. The information in these documents is selected, sorted and annotated to suit the target public. In this instance, therefore, Eurostat works in an advisory capacity.

Where the readership is wider and less well-defined, Eurostat provides the information required for an initial analysis, such as yearbooks and periodicals which contain data permitting more in-depth studies. These publications are available on paper or in videotext databases.

To help the user focus his research, Eurostat has created 'themes', i.e. subject classifications. The statistical documents and publications are listed by series: for example, yearbooks, short-term trends or methodology in order to facilitate access to the statistical data.

Y. Franchet
Director-General

Pour établir, évaluer ou apprécier les différentes politiques communautaires, la Commission européenne a besoin d'informations.

Eurostat a pour mission, à travers le système statistique européen, de répondre aux besoins de la Commission et de l'ensemble des personnes impliquées dans le développement du marché unique.

Pour mettre à la disposition de tous l'importante quantité de données accessibles et faire en sorte que chacun puisse s'orienter correctement dans cet ensemble, deux grandes catégories de documents ont été créées: les documents statistiques et les publications.

Le document statistique s'adresse aux spécialistes. Il fournit les données les plus complètes: données de référence où la méthodologie est bien connue, standardisée, normalisée et scientifique. Ces données sont présentées à un niveau très détaillé. Le document statistique est destiné aux experts capables de rechercher, par leurs propres moyens, les données requises. Les informations sont alors disponibles sur papier et/ou sur disquette, bande magnétique, CD-ROM. La couverture blanche ornée d'un graphisme stylisé démarque le document statistique des autres publications.

Les publications proprement dites peuvent, elles, être réalisées pour un public bien déterminé, ciblé, par exemple l'enseignement ou les décideurs politiques ou administratifs. Des informations sélectionnées, triées et commentées en fonction de ce public lui sont apportées. Eurostat joue, dès lors, le rôle de conseiller.

Dans le cas d'un public plus large, moins défini, Eurostat procure des éléments nécessaires à une première analyse, les annuaires et les périodiques, dans lesquels figurent les renseignements adéquats pour approfondir l'étude. Ces publications sont présentées sur papier ou dans des banques de données de type vidéotex.

Pour aider l'utilisateur à s'orienter dans ses recherches, Eurostat a créé les thèmes, c'est-à-dire une classification par sujet. Les documents statistiques et les publications sont répertoriés par série — par exemple, annuaire, conjoncture, méthodologie — afin de faciliter l'accès aux informations statistiques.

Y. Franchet

A. Introduction

1. New methodology ("ESSPROS 1996")

The data on expenditure and receipts of social protection schemes contained in this publication are drawn up according to the ESSPROS Manual 1996. ESSPROS stands for European System of integrated Social PROtection Statistics, a harmonised system providing a means of analysing and comparing social protection financial flows.

Social protection is defined as follows in the ESSPROS Manual 1996:

"Social protection encompasses all interventions from public or private bodies intended to relieve households and individuals of the burden of a defined set of risks or needs, provided that there is neither a simultaneous reciprocal nor an individual arrangement involved."

The list of risks or needs that may give rise to social protection is fixed by convention as follows:

- 1) *Sickness/Health care*
- 2) *Disability*
- 3) *Old age*
- 4) *Survivors*
- 5) *Family/children*
- 6) *Unemployment*
- 7) *Housing*
- 8) *Social exclusion not elsewhere classified."*

2. Expenditure

Expenditure of social protection schemes is broken down into social benefits, administration costs, transfers to other schemes and other expenditure.

Social benefits consist of transfers, in cash or in kind, by social protection schemes to households or individuals to relieve them of the burden of the eight risks or needs ("social protection functions") listed above. Social benefits are classified:

- by function (1. Sickness/Health care, 2. Disability, etc...)
- by whether or not they are subject to means-testing (i.e. by whether the beneficiary's income and/or wealth falls below a specified level);
- by type:
 - cash benefits (periodic and lump sum)
 - benefits in kind
 - re-routed social contributions.

Re-routed social contributions are payments made by one social protection scheme to another in order to maintain or accrue the rights of the people protected to social protection under the latter scheme.

Administration costs are the costs charged to the scheme for its management and administration.

Transfers to other schemes are unrequited payments made to other social protection schemes.

Other expenditure consists of miscellaneous expenditure by social protection schemes such as interest payable by the scheme to banks and other creditors in respect of loans taken up and payment of taxes on income or wealth.

3. Receipts

Receipts of social protection schemes comprise social contributions, general government contributions, transfers from other schemes and other receipts.

Social contributions are the costs incurred by employers on behalf of their employees or by protected persons to secure entitlement to social benefits.

Within social contributions by employers a distinction is made between actual and imputed contributions. Actual contributions include all payments made by employers to social protection schemes. Imputed contributions are the costs incurred by employers from granting social benefits, or from promising social benefits payable in the future, to their employees, former employees and their dependants, without involving an autonomous insurer and without maintaining separate reserves for this purpose in their balance sheets.

Social contributions by protected persons are broken down by socio-occupational status: employees, self-employed, pensioners and others.

A social protection scheme may also receive a third type of social contribution: re-routed social contributions (see paragraph 2 above).

General government contributions relate to the financing of social protection expenditure by central, state, regional or local governments in their role as public authorities rather than as employers. They consist of:

- the cost to general government of running public non-contributory schemes;
- financial support provided by general government to other resident social protection schemes.

Transfers from other schemes are unrequited payments received from other social protection schemes.

Other receipts come from a variety of sources, such as interest and dividends.

Receipts are also broken down by sector of origin according to the national accounts, i.e.

- Corporations
- General government (central government, state and local government, social security funds)
- Households
- Non-profit institutions serving households
- Rest of the world.

4. National values - Treatment of transactions between schemes

The national values contained in this publication are the sum of the values of all the individual social protection schemes.

Some financial flows of schemes refer to operations with other social protection schemes. The main transactions between social protection schemes are:

- Transfers between schemes;
- Re-routed social contributions.

These are recorded in ESSPROS 1996 as expenditure of the scheme from which they originate and as receipts of the scheme to which they are paid.

In order to obtain national values (i.e. for the overall system of social protection in each country), the operations of the different schemes need to be consolidated, for both expenditure and receipts.

In this publication:

- transfers between schemes are not included;
- re-routed social contributions are included for information, but they are not included in the calculation of aggregate values.

5. Contents of tables

Data relate to the 15 Member States of the European Union, Iceland and Norway. Totals are calculated for the European Union (EU-15) and for the euro-zone (EUR-11).

EUR-11 includes Belgium, Germany, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland.

EU-15 also includes Denmark, Greece, Sweden and the United Kingdom.

In general, data relate to the years 1990 to 1996.

Data for social benefits by function are also available for the period 1980-1989 (see section C.1).

Part B contains expenditure tables.

Section B1 contains comparative tables of total expenditure in the different countries.

Section B2 contains tables on the structure of expenditure (benefits, administration costs and other expenditure).

Section B3 contains more detailed tables on the structure of benefits by type (means-tested and non-means-tested, cash benefits and benefits in kind, etc.) for each country.

Part C contains tables of social benefits broken down by function.

Section C1 contains tables on the total of each function.

Section C2 contains tables of benefits specific to each function, for each country.

Part D contains tables of receipts.

Section D1 contains tables on the structure of receipts by type (social contributions, general government contributions, etc.)

Section D2 contains tables on the structure of receipts by sector of origin (corporations, general government etc.).

Part E contains economic and demographic data used in the calculations in the tables.

6. Important remarks

Because the implementation of the new methodology (ESSPROS 1996) may still cause some problems, the data are liable to be revised in future issues of this publication.

Some data are still provisional (abbr. "p"), or estimated (abbr. "**"). These data may be subject to statistical revisions.

Social benefits are recorded without any deduction of taxes or other compulsory levies payable on them by beneficiaries. Users of the data are warned that, for some types of analysis, the use of data on gross benefits may give rise to misleading conclusions.

Benefits granted within the framework of social protection can take many forms; however, in this publication (i.e. within the framework of ESSPROS 1996 "core system"), they are limited to:

- cash payments to protected persons,
- reimbursements of expenditure made by protected persons,
- goods and services provided directly to protected persons.

These are all direct benefits in the sense that they imply a direct rise in the disposable income of beneficiaries.

Many footnotes have been included in the tables where problems of comparability between figures may persist.

Data for the United Kingdom are on a financial year basis and relate to the year from 1 April to 31 March (for example, data for 1993 relate to the year from April 1993 to March 1994).

United Kingdom data do not include "Appropriate personal pension schemes".

Data for Greece are a first estimate according to the new methodology (ESSPROS 1996).

² Eurostat estimate from 1980 to 1989

The functions of social protection

Function

Brief description

1. Sickness/Health care

Income maintenance and support in cash in connection with physical or mental illness, excluding disability. Health care ended to maintain, restore or improve the health of the people protected irrespective of the origin of the disorder.

2. Disability

Income maintenance and support in cash or in kind (except health care) in connection with the inability of physically or mentally disabled people to engage in economic and social activities.

3. Old age

Income maintenance and support in cash or in kind (except health care) in connection with old age.

4. Survivors

Income maintenance and support in cash or in kind in connection with the death of a family member.

5. Family/children

Support in cash or kind (except health care) in connection with the costs of pregnancy, childbirth and adoption, bringing up children and caring for other family members.

6. Unemployment

Income maintenance and support in cash or in kind in connection with unemployment.

7. Housing

Help towards the cost of housing.

8. Social exclusion not elsewhere classified

Benefits in cash or kind (except health care) specifically intended to combat social exclusion where they are not covered by one of the other functions.

These conversion rates indicate the national currency units needed, in the various countries, to purchase the same basket of goods and services. If national currency values are converted using this rates, this gives values that are directly comparable in terms of the purchasing power of households.
